### **Sealcoating driveway in Asheville NC**

Sealcoating protects your driveway and keeps it looking new and fresh. What is Sealcoating? It is the tar like black substance over your driveway! It seals it and protects it from harmful weather.

For instance, your sealcoating will help protect your driveway from harsh winters, ice melt salts and chemicals and brutal summer heat.

***STOP paying for expensive driveway repairs and new paving jobs.***

Did you know that you can sealcoat your driveway annually for 1/10th the cost of a new one!

Asphalt pavement should be sealcoated within the first year it is paved. Sealcoating is the first step involved in protecting your asphalt pavement. Simply put, it safeguards asphalt by placing a protective barrier on the surface and slows pavement deterioration. This service,

like most asphalt maintenance, needs to be re-applied on a regular basis – usually every 2 to 3 years depending on traffic volume.

There are many benefits to seal coating your asphalt pavement. The most obvious benefit of seal coating to most people is beautification, the “like-new” appearance. However, sealcoating really does much more than this.

We offer FREE seal coating estimates in Asheville NC with no hidden charges.
